Professional summary

Data Science graduate from Umm Al-Qura University with honors, and practical experience building Machine Learning, Deep Learning, NLP, and end-to-end analytics solutions using Python, SQL, and BI tools. Developed projects focused on delivering meaningful insights and actively seeking a Junior Data Analyst or Data Scientist role to create measurable business impact.

Education

Umm Al-Qura University - College of Computing
B.Sc. in Data Science

2022 - Graduation in **Jun 2026**

AI Engineering Bootcamp – Saudi digital academy

May 2026 - Jun 2026

Completed intensive hands-on training in Machine Learning, Deep Learning, NLP, LLMs, RAG systems, AI Agents, and end-to-end AI solution development.

Experience

Intern in BSF Professional Supervision initiative

Feb 2024 – Nov 2025

- Participated in various courses and projects and initiatives to enhance professional skills and knowledge to align with the latest trends and developments in the banking services market and work environment and recognized among top performers during the closing ceremony.

IT Intern – General Syndicate of Cars (GSC)

Mar 2025 – Jun 2025

- Worked in the IT department performing data analysis tasks using SQL Server to support reporting and data-driven insights.

Projects

StanceLens Arabic Stance Detection | NLP, Arabert, Allam, Llama | Graduation project

- Developed an Arabic stance detection system to analyze public attitudes toward Saudi women's participation in sports using **1,350 manually collected and annotated social media comments** from X and YouTube and evaluated transformers and LLM-based models, achieving **93% F1-Macro with AraBERT** and **91% F1-Macro with LoRA-finetuned Allam**, while comparing their effectiveness on Arabic social media text.

Emergency Patient Risk Prediction | Python, Random Forest, ipywidgets

- Built a machine learning model to classify emergency patients into high-, medium-, and low-risk categories using vital signs, symptoms, and medical conditions using a **Random Forest** classifier that achieved **89% accuracy** and developed an interactive prediction interface using ipywidgets for real-time risk assessment.

Riyadh Real Estate Data Analysis | SQL, Power BI

- Analyzed 10,000 Riyadh real estate data using SQL and visualized insights in Power BI dashboards, exploring price trends, neighborhood comparisons, property features, and factors affecting pricing across regions.

Certification

IBM Data Science Professional Certificate, **2025**

Google Advanced Data Analytics Experience, **2025**

Skills

Programming: Python (Pandas, NumPy, Scikit-learn, TensorFlow, PyTorch, NLTK)

Data Analysis: Exploratory Data Analysis (EDA), Data Preprocessing, Data Cleaning, Statistical Analysis

Artificial Intelligence: Machine Learning, Natural Language Processing (NLP), Deep Learning, Large language models (LLMs)

Data Visualization: Tableau, Power BI, Matplotlib, Seaborn

Databases: SQL, SQL Server, Relational Databases

Soft Skills: Critical Thinking, Problem-Solving, Communication, Time management, Leadership

Languages

Arabic (Native), English
